Hepcinat® LP

Hepcinat LP is a smashing remedy for Hepatitis "C". Ledipasvir in combination with sofosbuvir forms the necessary complex for the treatment of hepatitis C. Now only one drug is needed to stop the virus and eliminate its further spreading. Hepcinat LP is a unique drug that combines the properties of ledipasvir and sofosbuvir, which can suppress at once two types of proteins involved in the spread of the hepatitis C virus in the body, these are the NS5A and NS5B polymerases.

Ledipasvir and Sofosbuvir tablet

What is ledipasvir and sofosbuvir?

Ledipasvir and sofosbuvir are antiviral medications that prevent hepatitis C virus (HCV) from multiplying in your body.

Ledipasvir and sofosbuvir is a combination medicine used to treat hepatitis C genotypes 1, 4, 5, or 6. This medicine is for use in adults and children who are at least 12 years old or who weigh at least 77 pounds (35 kilograms).

Ledipasvir and sofosbuvir is sometimes given in combination with another medicine called ribavirin.

Ledipasvir and sofosbuvir may also be used for purposes not listed in this medication guide.
