Creon

Generic Creon is a combination of three enzymes (proteins): lipase, protease, and amylase. These enzymes are normally produced by the pancreas and are important in the digestion of fats, proteins, and sugars. Pancrelipase is used to replace these enzymes when the body does not have enough of its own. Certain medical conditions can cause this lack of enzymes, including cystic fibrosis, chronic inflammation of the pancreas, or blockage of the pancreatic ducts. Pancrelipase may also be used following surgical removal of the pancreas.

Active ingredient: [Pancrelipase](#)

Brand(s): Panstal

Manufacturer: Cipla Limited

Disease(s): Lack Of Enzymes / Cystic Fibrosis / Chronic Inflammation Of The Pancreas / Blockage Of The Pancreatic Ducts

Creon 150mg
