Pasitrex ® Ointment

What is this product?

Pasitrex Ointment is a medication used in the treatment of psoriasis. It works by lowering the rate at which skin cells grow. This reduces the red, scaly patches on the skin.

More than recommended use of this medicine may cause hypercalcaemia. However, this condition normalizes quickly after treatment is discontinued.
Skin irritation is a common side effect of this medicine, but it is mild and goes away quickly. Inform your doctor if it persists for long period of time.

PASITREX OINTMENT SIDE EFFECTS

- Dry skin
- Skin irritation
- Itching
- Burning sensation
- Stinging sensation
