Albuterol Inhaler

What is this medicine?

Albuterol(also known as salbutamol) is a bronchodilator that relaxes muscles in the airways and increases air flow to the lungs. Albuterol inhalation is used to treat or prevent bronchospasm in people with reversible obstructive airway disease. Albuterol is also used to prevent exercise-induced bronchospasm. Albuterol inhalation may also be used for purposes not listed in this medication guide.

How should I use this medicine?

Use albuterol inhalation exactly as prescribed by your doctor. Do not use in larger or smaller amounts or for longer than recommended. Follow the directions on your prescription label.
