## Xalacom®

**Xalacom®** - an antiglaucoma combined drug with a miotic effect. Each ml of **Xalacom®** contains Latanoprost 50mcg and Timolol Maleate LP equivalent to timolol 5mg. These substances contribute to the effective reduction of increased intraocular pressure, due to two different mechanisms of action, which contributes to a better clinical effect in comparison with monotherapy.

Active ingredient: [Latanoprost + Timolol](#)

Brand(s): Xalacom

Manufacturer: Pfizer

Disease(s): Glaucoma

## Timolol and Latanoprost eye drops

### What is this medicine?

LATANOPROST belongs to a group of medicines known as prostaglandin analogues. Timolol belongs to a group of medicines known as beta-blockers. Latanoprost works by increasing the natural outflow of fluid from the eye into the bloodstream. TIMOLOL works by slowing the formation of fluid in the eye.

Timolol and Latanoprost is used to reduce the pressure in your eye if you have conditions known as open angle glaucoma or ocular hypertension.
