Fildena®

Fildena® - a new regulator of potency based on Sildenafil, a distinctive feature of which is bold design in purple color. If the manufacturers of other generics create their own medicines in the colors of Viagra® to make it as similar as possible to the basic prototype, for example, Fortune Health Care, the producers of **Fildena®** 100 mg, on the contrary, want to show all the individuality of the drug. And this individuality deserves your attention. Psychologists say that purple color increases your self-esteem. Fortune Health Care contributed to this increase by creating the most popular dosage of the drug in purple color. The Studies of **Fildena®** 100 mg in Europe showed that this drug contains a very high-quality Sildenafil, which has no difference in effectiveness from the famous Viagra®. In addition, the coat of all **Fildena®** dosages is made of a special substance that accelerates the digestibility of the tablet, giving an average effect of 5% faster.

Active ingredient: [Sildenafil Citrate](#)

Brand(s):Fildena
