Xalacom

Xalacom - eye drops, related to combined antiglaucoma drugs. The drops contain 2 active components: timolol maleate, which reduces the accumulation of moisture, watery consistency in the ciliary epithelium and latanoprost, which reduces the intraocular pressure due to the acceleration of the outflow of water accumulated. The drops act already during the first hour after the beginning of their use and maximum efficiency develops after six-eight hours.

Active ingredient: [Latanoprost + Timolol](#)

Brand(s):Latocom

Manufacturer: Sun Pharma

Disease(s):Glaucoma

Xalacom 0.005% + 0.5% 2.5ml

Timolol and Latanoprost eye drops

What is this medicine?

LATANOPROST belongs to a group of medicines known as prostaglandin analogues. Timolol belongs to a group of medicines known as beta-blockers. Latanoprost works by increasing the natural outflow of fluid from the eye into the bloodstream. TIMOLOL works by slowing the formation of fluid in the eye.

Timolol and Latanoprost is used to reduce the pressure in your eye if you have conditions known as open angle glaucoma or ocular hypertension.

Both these conditions are linked to an increase in the pressure within your
