Risedronate Sodium tablet

What is this medicine?

RISEDRONATE reduces calcium loss from bones. It helps make healthy bone and to slow bone loss in patients with Paget's disease and osteoporosis. It may be used in others at risk for bone loss.

What should I tell my health care provider before I take this medicine?

They need to know if you have any of these conditions:

- dental disease
- esophagus, stomach, or intestine problems, like acid reflux or GERD
- kidney disease
- low blood calcium
- problems sitting or standing
- trouble swallowing
- an unusual or allergic reaction to risedronate, other medicines, foods, dyes, or preservatives
- pregnant or trying to get pregnant
- breast-feeding

How should I use this medicine?

You must take this medication exactly as directed or you will lower the amount of medicine you absorb into your body or you may cause your self harm. Take this medicine by mouth first thing in the morning, after you are up for the day. Do not eat or drink anything before you take this medicine.
