HIV 1/2/O Rapid Test Cassette

What is this product?

HIV 1/2 test - is a rapid **test** for the diagnosis of Human Immunodeficiency Virus to detect antibodies to HIV type 1, type 2 and Subtype O qualitatively in whole blood, serum or plasma to aid in the diagnosis of HIV infection. It is intended for professional in vitro diagnostic use only.

What should I know about HIV?

- **HIV (Human Immunodeficiency Virus)** is the etiologic agent of **Acquired Immune Deficiency Syndrome (AIDS)**
- The virion is surrounded by a lipid envelope that is derived from the host cell membrane. Several viral glycoproteins are on the envelope.
- Each virus contains two copies of positive-sense genomic RNAs.
- **HIV-1** has been isolated from patients with AIDS and AIDS-related complex, and from healthy people with high potential risk for developing AIDS.
- **HIV-1** consists of **Subtype M** and **Subtype O**. Highly divergent strains of HIV-1 were first recognized in 1990 and grouped provisionally as Subtype O as this variation has similar glycoprotein markers to HIV-1 but a slight variation to the protein marker. Although rarely compared to HIV-1 and HIV-2, infections caused by
