Rashfree®

Rashfree® - cream, a brand of Benzalkonium chloride and Zinc oxide. Zinc oxide is a topical skin product that is used as a protective coating for mild skin irritations and abrasions. It can promote the healing of chapped skin and diaper rash. Zinc oxide works as a mild astringent and has some antiseptic properties. Zinc oxide is commonly used to prevent or to treat diaper rash by forming a protective barrier between the skin and the diaper.

Active ingredient: [Benzalkonium Chloride, Zinc Oxide](#)

Brand(s):Rashfree
