Coumadin

Generic Coumadin is used for treating or preventing blood clots that may occur in the veins and lungs. It is used to treat or prevent blood clots that may occur because of a certain type of abnormal heartbeat (atrial fibrillation) or heart valve replacement. It is also used to reduce the risk of death, recurring heart attack, or blood clotting events (eg, stroke) after a heart attack.

Active ingredient: [Warfarin](#)

Brand(s): Warf

Manufacturer: Cipla Limited

Disease(s): Blood Clots
