Proviron tablets

What is this product?

Proviron, the brand name for mesterolone, is a synthetic type of male sex hormone. Mesterolone, chemically known as 1-methyl-5 α -dihydrotestosterone (DHT), is methylated (the addition of a methyl group –CH₃) making it an active steroid very similar to natural DHT that does not convert into estrogen or progesterone (both female hormones) once in the body. Proviron has many positive effects on the body, including increasing muscle mass, enhancing testosterone levels and treating male sexual dysfunction.

Testosterone Enhancer
