## What is Budesonide Inhalation?

Budesonide is a corticosteroid that prevents the release of substances in the body that cause inflammation.

Budesonide Inhalation is used to prevent asthma attacks in adults and children who are at least 6 years old.

Budesonide Inhalation may also be used for purposes not listed in this medication guide.

## Important information

Do not use Budesonide Inhalation to treat an asthma attack that has already begun. Budesonide Inhalation is not a rescue medicine. It will not work fast enough to treat an asthma attack. Use only a fast-acting inhalation medicine to treat an asthma attack.

You should not use this medicine if you have a severe allergy to milk proteins.

Contact your doctor if your asthma symptoms do not improve after using Budesonide Inhalation for 2 weeks.
