## Avanafil & Dapoxetine

### What is this medicine?

**Extra Super Avana** is a new combination ED medicine.

It contains avanafil and dapoxetine (Priligy). Avanafil works similarly to Viagra and helps achieve and sustain an erection. Dapoxetine helps to make erections prolonged.

Avanafil belongs to the same class of ED drugs (PDE5 inhibitors) as Viagra, but has a quicker onset of action. It can start working in as little as 15 minutes.

Studies also show that Avanafil has less side effects compared to Viagra.
