Isofair®

Isofair is a special soft gel capsule of a red color. They are designed to treat acne, as well as other problems of this kind on the skin. The active substance of this drug is a synthetic analogue of vitamin A, isotretinoin. Tablets act primarily on the human genes, which are responsible for the functioning of the sebaceous glands. As a result of the use of this drug, there is a significant decrease in the sebum secretion. This leads to complete neutralization of acne in problem areas. In addition, Isofair also has regenerative properties, which also significantly speeds up the treatment process. As soon as acne and other pathologies on the skin begin to disappear, as a result of the action of the drug components in the integumentary system, metabolism is activated. All this leads to the most rapid healing of affected areas of the skin without the slightest sign of problems. This **Generic** Accutane is produced by an Indian pharmaceutical company, named Johnlee Pharmaceuticals.

Active ingredient: [Isotretinoin](#)

Brand(s): Isofair

Manufacturer: JohnLee

Disease(s): Acne
