Mydriacyl

Mydriacyl causes muscles in the eye to become relaxed. This dilates (widens) the pupil so that it does not react (narrow) when your doctor shines an examination light into your eye. **Mydriacyl** (for the eyes) is used to dilate the pupil for an eye examination or other diagnostic procedure.

Active ingredient: [Tropicamide](#)

Brand(s): Tropicacyl

Manufacturer: Sunways India

Tropicamide ophthalmic

What is tropicamide ophthalmic?

Tropicamide causes muscles in the eye to become relaxed. This dilates (widens) the pupil so that it does not react (narrow) when your doctor shines an examination light into your eye.

Tropicamide ophthalmic (for the eyes) is used to dilate the pupil for an eye examination or other diagnostic procedure.

Tropicamide ophthalmic may also be used for purposes not listed in this medication guide.

Important Information

Protect your eyes from bright light while your pupils are dilated.

Before taking this medicine
